

NOTICE OF TERMINATION

Served To: **Mitt Romney**

From: Los Angeles County Democratic Party
Concerned Local Business Owners & Residents

Causes:

Romney Economics:

1. Romney Economics isn't about creating jobs or helping the middle class.
2. It's about two sets of rules: one for those at the top and another for everyone else.
3. It's about doing whatever it takes for him and his investors to profit, regardless of the cost to workers, companies and communities.

Broken Promises:

As Governor, Romney Economics promised Massachusetts more jobs, less debt and smaller government, and the economic conditions were primed for Romney to keep his promises. But once Romney took office, he broke every single one of those promises.

- **Jobs:**

- Under Romney, Massachusetts plummeted to 47th out of 50 in job creation.
- Romney watched the state's manufacturing decline by twice the national average, the third-worst record in the country.

- **Debt:**

- Romney left his successor with \$1 billion deficit, and Massachusetts taxpayers were left with more debt per person than any other state.
- Under Romney, Massachusetts debt grew by 16.4 percent while taxes and fees were raised by \$750 million a year on middle-class families and businesses.

- **Government:**

- On Romney's watch, Massachusetts government jobs grew at six times the rate of private-sector jobs.

Now Romney is trying to do it again. He's making the same failed promises to America that he made to Massachusetts a decade ago, with policies that would do the opposite.

AMERICA CAN'T AFFORD ROMNEY ECONOMICS
